About Me

I'm a 30-year-old self-taught developer. I started learning 5 years ago. I thought I would go for a field that was stable and secure, so I chose web development. It is in the best interest of companies to hire personnel who are self-motivated and driven. I am that person. Worked at Cape Ann Enterprises in Bosnia for two years and 11 months. Currently employed and working in a team environment at a company called Virgin Pulse A team environment is efficient and productive, which I understand and appreciate. I have the ability to compromise, be respectful of others, and be a good listener as a team member. I can be a leader, when necessary, but can also be an equal player on the team if the job calls for it.

I tend to do well in a team setting because I can relate to others well, have a professional demeanor, and understand what it takes to get the job done. I can help delegate tasks, compromise, and fulfill any role on the team that is needed. I am flexible in working independently or on a team, as needed by the task at hand.

Skills

Work History

Web Developer, Cape Ann Enterprises, Tuzla, Bosnia and Herzegovina

November 2018 - November 2021

Virgin Pulse, Software Developer Engineer in Test

November 2021 - Current time

- Very good at HTML5, CSS, Bootstrap, JavaScript/TypeScript, jQuery, Angular, BackstopJS visual regression testing, Drupal theming, Drupal modules.
- Participating at meetings with executives and discussed project goals and milestones.
- Validated code with Drupal (7 and 8), AngularJS, and corrected issues. Also worked on maintaining and enhancing the websites developed by the company.
- Used programming capabilities in PHP, SQL and JavaScript, and other libraries as needed.
- Hands-on experience using UNIX and Apache web servers.
- Applied knowledge of JavaScript and Object-Oriented Programming to create successful designs.
- Built website interfaces with HTML and CSS.
- Converted mockups into HTML, JavaScript, AJAX and JSON.
- Researched new technologies, software packages, and hardware products for use in website projects.
- Fluent knowledge of the English language, and currently learning German.
- Good relationship with DevOps topics like Linux Server, Git Flow, CI, Jira, Redmine, Jenkins.
- Besides these professional skills, I'm a hard-working, approachable, honest person who gives his best to finish the job.
- Jest, Cypress, SonarQube, Selenium
